Our Studio

Project Orange is a resourceful and agile Architecture and Design Studio set up by Christopher and James in 1997, based in Suffolk and London. We believe in working collaboratively to generate purposeful and sustainable projects. This small book is a celebration of our buildings; from houses and homes to offices, schools and hotels. We see our work as bold and adaptable thriving in its context.

In the face of the ecological crisis we are actively taking an ethical position that values resilience, innovation and society. New stories are being created.
