I _projectorange

This small collection of recent work has been collated to illustrate the range of projects with which the studio engages. From individual houses and housing development in Suffolk, to restaurants in Dublin and India, the work is united by our approach to narrative, place and detail.

We are also aware that the Climate Emergency now shapes how we design and we are committed to re-use and retrofit wherever viable, sourcing sustainably and working with agility.

Christopher Ash and James Soane
Founders Project Orange (1997)
